

# KAPNICK HREMOTE

⇒ Strength. Knowledge. Direction.®

HRemote is a suite of benefit services that includes software and administrative services to streamline HR and benefits administration. Currently, more than 5,000 employers use online benefits platforms to significantly reduce administration costs, eliminate time-consuming paperwork, and enable a more strategic HR.

Kapnick has been using HRemote to streamline our clients' HR and benefits since 2000. This unique blend of benefits expertise, superior technology, and responsive service delivers better results for less money in a complex and rapidly changing marketplace.

## CLIENT FRUSTRATIONS

HR can be challenging and benefits administration is more complicated than it looks. Some online programs are confusing and difficult to use, with little to no technical support. Because of this, open enrollment can be an extremely stressful period for HR Managers and Administrators.

## KAPNICK'S SOLUTION

Our goal is to streamline the entire HR, benefits, and online enrollment process so that it's as efficient and painless as possible. HRemote software was designed with an average, non-technical user in mind—as a result, it is intuitive and simple for employees, HR Managers, and Administrators alike.

Our services are designed to ease your burden, not create another one. HRemote includes the following services:

- | COBRA
- | Flex (FSA)
- | Benefits Online Platforms
- | Call Center

## OUR HREMOTE TEAM

We believe we've got the best technology on the market today. It's intelligent, fully automated, and can be configured the way you need it. But our products and services are only as good as the people behind them. Our experienced team comes from first-rate companies in the benefits, consulting, outsourcing, and technology sectors and they uphold high standards of excellence in everything they do.
