

# Kapnick's trusted guide to cyberhealth

A SensCy Score™ of 800 or above is what you should strive for.

## Use our SensCy Score™ to demystify cybersecurity

Cyberattacks are constantly changing and it is hard for small and medium-sized organizations to keep up. [How do you know if your organization has the right cybersecurity safeguards?](#)

Schedule your cyberhealth evaluation to determine your SensCy Score™. The free, no-obligation evaluation takes about 20 minutes to complete.

At the end of the evaluation, you will get your score and a follow-up email summarizing the cybersecurity safeguards in place and critical gaps in your cyber hygiene at your organization.

The SensCy Score™ was developed by SensCy™, whose mission is to improve organizations cyberhealth by providing a high value, easy to understand solution through continuous personal interactions, technology, unbiased referrals, and education. For more information, visit our website at [www.senscy.com](http://www.senscy.com).

## Help mitigate your risk of a cyberattack uncover your SensCy Score™

Schedule your free no-obligation SensCy Score™ meeting by visiting our website or scanning the QR code.

### What is the SensCy Score™ and why does it matter?

SensCy Score™ is the essential measure of your cyber health. In today's increasingly connected world, the importance of maintaining strong cybersecurity cannot be overstated. Your SensCy Score™ is a comprehensive evaluation of your online security, similar to a credit score for your finances.

With your SensCy Score™, you can monitor the health of your online presence and make informed decisions to protect your sensitive information. In all cases, after implementing SensCy's services, our clients have dramatically improved their SensCy Score™ and reduced their risk of a cyberattack.
